**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-5, 10-15, 18, 21-22, and 36-39 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by DiGiovanni et al [USPAT 5,802,236].

DiGiovanni et al disclose an article comprising a micro-structured optical fiber, and method of making such fiber.

In re claim 10, DiGiovanni et al teach at column 2, line 54 a step index profile.

In re claim 11-12, DiGiovanni et al show rare-earth with Fluoride doped optical fiber.

In re claim 18, DiGiovanni et al teach at column 7, lines 24-33 that dielectric such as glass can be filled in the voids.

With respect to method claims, it would have been obvious to the ordinary skilled person in the art at the time DiGiovanni et al's device was made to practice the method steps.

***Allowable Subject Matter***

Claims 6-9, 16-17, 19-20, and 23-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose or suggest an optical waveguide perform and its method of making comprising all the specific elements with the specific combination including the elongated forming a periodic array as set forth in claims 6-9, 16-17, 19-20, and 23-35.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Further references of interest are cited on Form PLO-892, which is attachment to this office action.
